COMPETENCIES

- Technical leadership and team management
- Backend engineering and software development
- Solution architecture and system design
- Performance and production troubleshooting
- Mentoring and stakeholder communication

LANGUAGES

- English - B2+
- Ukrainian - Native
- Polish - Basic

P

PROFESSIONAL SUMMARY

Java backend engineer and technical leader with 9+ years of experience building scalable business applications and distributed systems. I specialize in backend development, microservices architecture, reactive programming, and technical leadership.

Most recently, I served as Java Team Lead and Solution Architect for a high-load Remote Gaming Server platform, leading 7 backend engineers while remaining hands-on with architecture, development, delivery, mentoring, and production troubleshooting.

Designed and supported platforms handling tens of millions of business transactions per day, with integrations across dozens of operators and hundreds of games. Previous domain experience includes AI-driven sales intelligence, healthcare, e-commerce, and SaaS.

S

SKILLS

Leadership and Management

- Technical leadership and team management
- Mentoring and coaching
- Requirements analysis
- Estimation and delivery planning
- Architecture and code reviews

Programming Languages

Java 8 / 11 / 17 / 19 / 21

Databases

PostgreSQL, MySQL, Oracle, MS SQL Server

Messaging and Caching

Kafka, RabbitMQ, Redis, Hazelcast

Methods

Agile, Scrum, load testing, production support

Frameworks and APIs

- Spring Boot, Spring Cloud, Spring WebFlux
- Spring Security, Spring Data
- Project Reactor, R2DBC, JPA, Hibernate
- REST APIs, gRPC, OpenAPI, OAuth2, JWT

Architecture

Microservices, distributed systems, event-driven architecture, monolith modernization

Cloud and DevOps

Docker, Kubernetes, Rancher, AWS, GitLab CI/CD, Jenkins, Maven, Gradle, Flyway, Liquibase

Testing and Quality

JUnit, Mockito, AssertJ, integration testing, k6, SonarQube, Checkstyle

AI-assisted Engineering

Claude Code, Microsoft Copilot

WORK EXPERIENCE

9+ years across iGaming, FinTech-related transaction flows, AI sales intelligence, healthcare, e-commerce, and retail decision intelligence.

Primary focus

- High-load Java platforms
- Distributed systems
- Reliable transaction processing
- Database performance
- Technical leadership

W WORK EXPERIENCE

Java Team Lead / Solution Architect

2023 - 2026

EveryMatrix | Remote Gaming Server Platform

- Led backend development for a business-critical RGS platform used by gaming operators and game providers worldwide.
- Led a team of 7 backend engineers and owned architecture, technical planning, code reviews, mentoring, delivery, and production support.
 - Designed and scaled reactive Java microservices processing tens of millions of business transactions per day while maintaining stable operation during major traffic spikes.
 - Improved reliability through Kafka-based recovery with durable events, manual acknowledgements, idempotent processing, retry handling, and dedicated processing for failed events.
 - Optimized MySQL tables containing billions of records using partitioning, compression, indexing, execution-plan analysis, and aggregated reporting tables.
 - Led the migration of two RGS platforms to a shared on-premises Kubernetes environment using load testing and bottleneck analysis.
 - Delivered wallet, bet, win, refund, jackpot, promotion, and free-spin integrations where consistency and accurate financial reporting were critical.

Technology stack: Java 17/19/21, Spring Boot, Spring WebFlux, Spring Cloud, Project Reactor, Kafka, MySQL, R2DBC, REST, gRPC, OpenFeign, Hazelcast, Docker, Kubernetes, Rancher, GitLab CI/CD, Gradle

Senior Software Engineer

2021 - 2023

Exoft | Spotlight.ai | AI-driven Value Intelligence Platform

- Designed and implemented backend services for a microservices platform helping sales organizations automate discovery and build value cases.
- Developed Salesforce CRM integrations and delivered new platform features and performance improvements.
- Contributed to solution architecture, automated quality controls, code reviews, mentoring, deployment, monitoring, and production support.

Technology stack: Java 11, Spring Boot, Spring Cloud, Spring Security, JPA, PostgreSQL, Project Reactor, Redis, AWS S3, Docker, REST APIs, Salesforce CRM, GitLab CI/CD

Software Engineer

2018 - 2021

SoftServe | CompuGroup Medical (Austria) | Healthcare Platform

- Developed enterprise software components for a large-scale platform supporting hospitals and medical organizations.
- Contributed to architecture and design, implemented new features, and investigated production issues.
- Performed code reviews and testing while collaborating with international teams using Agile delivery practices.
- Maintained technical documentation and supported production operations.

Technology stack: Java 8, Spring, Hibernate, MS SQL Server, Oracle, H2, Jenkins, GitLab, Maven, JMeter, Enterprise Architect, Jira, Confluence

Full-Stack Software Engineer

2017 - 2019

DevCom | CollegeBom (USA) | Marketplace Platform

Marketplace platform supporting e-commerce, barter exchange, and auction-based transactions.

- Developed REST APIs and business services for marketplace workflows.
- Contributed to application architecture, requirements analysis, estimation, and Angular frontend development.
- Supported deployment, maintenance, and production operations.

Technology stack: Java 8, Spring Boot, Hibernate, JPA, REST APIs, Angular, MySQL, OAuth2, Swagger, Jenkins, Git

Full-Stack Software Engineer

2017 - 2018

DevCom | Master Planner (Denmark) | Decision Intelligence Platform

Automated Decision Intelligence platform supporting retail decision-making processes.

- Developed backend services and web functionality.
- Participated in solution design and requirements analysis and collaborated directly with stakeholders.
- Supported product maintenance and continuous enhancement.

Technology stack: Java 7, Spring MVC, Spring Security, Hibernate, JPA, JavaScript, jQuery, MySQL, Jenkins, Git

EDUCATION

Master's Degree in Physics
Ivan Franko National University
Faculty of Physics
Graduated in 2004
